

## **PROPOSED PET HERPETOFAUNA KEEPING CATEGORY LISTS.**

### **1. INTRODUCTION**

The following draft category lists have been prepared for illustrative purposes only.

It is intended that only a proportion of the allowable species under category lists will be initially approved for keeping. There will be a need to be conservative when considering approval for the importation or taking from the wild of herpetofauna for the pet industry. Taking from the wild by specially licensed “pet herpetofauna harvesters” and subsequent breeding will clearly need to be targeted to species for which there will be a significant captive keeping interest and which will also prove to be resilient to such keeping. Species permitted for keeping in the more basic category lists will be restricted to those that are easy to breed and keep in captivity, as will be proven over time. Within a few short years of operating any such licensing system the animals to be kept will therefore be generally exclusively obtained from captive breeding.

Some of the more experienced reptile keeping enthusiasts will undoubtedly wish to obtain different species for keeping. Applications to introduce new species for keeping will be considered with regard to the possible impacts on the species in the wild, the resilience of the species to captive keeping and breeding and any possible impacts on nature conservation values from escapes or unauthorised releases of such species. In many cases there may be little concern in these areas. A procedure of trial keeping by a licensed keeper could be implemented to test the suitability of specific species for keeping and also for verification of the proposed keeping schedule for specific species.

Please note that the draft category lists are not to be considered as shopping lists. They are intended to provide a reasonable overview of the species that could be permitted for keeping and under what circumstances. The initial lists will certainly require significant amendment over the first few years of operations. It is hoped that the amendment process will be through reasonable public consultation and publication of Gazette Notices with revised category lists.

Many species permitted for keeping will be likely to have highly specialised keeping requirements, such as diet, security (venomous snakes) or exercise. These species may be identified as “Special Keeping Requirements” (SKR) species. It is suggested persons wishing to keep such specimens will need to qualify for the specific species licence category and demonstrate that they have a facility that meets the SKR of the species in question before they take possession of such an animal.

The following private keeping category lists are proposed for consideration:

1. Exempt from Licensing
2. Basic Keeping Licence
3. Standard Keeping Licence
4. Advanced Keeping Licence
5. Expert Keeping Licence
6. Prohibited for Keeping.

### **2.0 DRAFT CATEGORY LISTS**

#### **2.1 Category List 1: Western Australian Pet Herpetofauna Species “Exempt From Licensing” for Private Keeping**

No licence required to keep the listed fauna. Animals may only be obtained from existing private collections or from persons licensed to take specimens from the wild or breed them in captivity. Species on this list are very common, widespread, non-dangerous and able to be adequately kept by an inexperienced keeper. All species naturally occur in Western Australia.

Given the need to be cautious in the introduction of a new licensing system, it is likely that there will initially be no species included on such a list. Over time, however, as has happened with avian fauna keeping categories, the introduction of exempt species will most likely occur.

Any person keeping these animals must ensure they are kept in artificial habitats adequate to provide the animals maintenance requirements and to prevent their escape. It is the owner's responsibility to ensure such animals receive adequate nutritional requirements and are treated humanely at all times.

## 2.2: Category List 2: Western Australian "Basic" Pet Herpetofauna Species

A Basic Pet Herpetofauna Keeping and breeding will be required for any persons wishing to keep herpetofauna species listed in this category. The licensee will be required to provide biannual returns detailing stock changes of all list 2 fauna. Animals may only be obtained from existing private collections or from persons licensed to take specimens from the wild or breed them in captivity. Species on this list are common in the wild, widespread and easy to maintain. All species listed naturally occur in Western Australia.

Any person keeping these animals must ensure they are kept in artificial habitats adequate to provide the animals maintenance requirements and to prevent their escape. It is the owner's responsibility to ensure such animals receive adequate nutritional requirements and are treated humanely at all times.

### LIZARDS

1 <i>Strophurus ciliaris</i> (Boulenger, 1885) NSW NT Qld SA WA	Northern Spiny-tailed Gecko
2 <i>Strophurus spinigerus</i> (Gray, 1842) WA	South-west Spiny-tailed Gecko
3 <i>Pogona minor</i> (Sternfeld, 1919) NT SA WA	Western Bearded Dragon
4 <i>Egernia depressa</i> (Günther, 1875) NT SA WA	Pygmy Spiny-tailed Skink
5 <i>Egernia formosa</i> Fry, 1914 WA	Goldfields Crevice Egernia
6 <i>Egernia napoleonis</i> (Gray, 1838) WA	South-western Crevice Egernia
7 <i>Tiliqua multifasciata</i> Sternfeld, 1919 NT Qld SA WA	Centralian Bluetongue
8 <i>Tiliqua occipitalis</i> (Peters, 1863) NSW NT Qld SA Vic WA	Western Bluetongue
9 <i>Tiliqua scincoides intermedia</i> Mitchell, 1955 NT Qld WA	Northern Bluetongue
10 <i>Tiliqua rugosa rugosa</i> (Gray, 1825) SA WA	Bobtail

### FROGS

11 <i>Litoria caerulea</i> (White, 1790) NSW NT Qld SA WA	Northern Green Tree Frog
12 <i>Litoria moorei</i> (Copland, 1957) WA	Western Green Tree Frog

## 2.3: Category List 3: Western Australian "Standard" Pet Herpetofauna Species

A Standard Pet Herpetofauna Keeping and Breeding will be required for any persons wishing to keep herpetofauna listed below. The licensee will be required to provide annual returns detailing stock changes. Animals may only be obtained from existing private collections or from persons licensed to take specimens from the wild or breed them in captivity. Species on this list are common in the wild, reasonably widespread and quite easy to maintain. All species listed naturally occur in Western Australia.

Any person keeping these animals must ensure they are kept in artificial habitats adequate to provide the animals maintenance requirements and to prevent their escape. It is the owner's responsibility to ensure such animals receive adequate nutritional requirements and are treated humanely at all times.

### TURTLES

- 1 *Chelodina oblonga* Gray, 1841 WA
- 2 *Chelodina rugosa* Ogilby, 1890 NT Qld WA
- 3 *Chelodina steindachneri* Siebenrock, 1914 WA

Oblong Turtle  
Northern Long-necked Turtle  
Flat-shelled Turtle

#### LIZARDS

 50 *Limnodynastes dorsalis* (Gray, 1841) WA Western Banjo Frog  
 51 *Pseudophryne occidentalis* Parker, 1940 SA WA Orange-crowned Toadlet

## 2.4 Category List 4: Western Australian "Advanced" Pet Herpetofauna Species

An Advanced Pet herpetofauna Keeping and breeding will be required for any persons wishing to keep reptiles and amphibians listed on this schedule. Applicants require at least two years as holder of the Standard Licence or equivalent experience to qualify for the Advanced Licence.

Species on this list may be uncommon in the wild, of restricted natural distribution, be specialist feeders on native fauna or believed to be more difficult to maintain than category list 1,2 or 3 species.

The licensee will be required to provide annual returns detailing stock changes of all category 4 fauna and to keep a record book detailing all stock changes updated within 12 hours of any such transaction. Licensees will also be required to provide written notification of stock transfers to other Advanced or Expert Licensees or Dealers within seven days of such a transaction.

Animals may only be obtained from existing private collections or from persons licensed to take specimens from the wild or breed them in captivity.

Any person keeping these animals must ensure they are kept in artificial habitats adequate to provide the animals maintenance requirements and to prevent their escape. It is the owner's responsibility to ensure such animals receive adequate nutritional requirements and are treated humanely at all times. Special Keeping Requirements (SKR) may be imposed for some species, which would further restrict keeping and trade, as outlined in the Introduction.

70	<i>Litoria rothii</i> (de Vis, 1884) NT Qld WA	Roth's Tree Frog ###

### 2.5 Category List 5: Western Australian "Expert" Pet Herpetofauna Species

An Expert Pet herpetofauna Keeping and breeding will be required for any persons wishing to keep reptiles and amphibians listed below. Applicants require at least two years as holder of the Advanced Keeping and breeding or equivalent experience to qualify for the Expert Keeping and breeding.

Species on this list include those that are venomous and potentially dangerous, are difficult to maintain, or are threatened in the wild.

The licensee will be required to provide annual returns detailing stock changes of all species held and to keep a record book detailing all stock changes updated within 12 hours of any such transaction. Licensees will also be required to provide written notification of stock transfers to other Advanced or Expert Licensees or Dealers within seven days of such a transaction.

Animals may only be obtained from existing private collections or from persons licensed to take specimens from the wild or breed them in captivity.

Any person keeping these animals must ensure they are kept in artificial habitats adequate to provide the animals maintenance requirements and to prevent their escape. It is the owner's responsibility to ensure such animals receive adequate nutritional requirements and are treated humanely at all times. Special Keeping Requirements (SKR) may be imposed for some species, which would further restrict keeping and trade, as outlined in the Introduction.

Expert Keeping and breeding Applicants must be at least eighteen years of age. Applicants to keep dangerously venomous reptiles must undertake to maintain such reptiles within an appropriate distance of a major medical centre or to have other arrangements to ensure ready access to appropriate anti-venom in the event of a snake bite. Some species may also have other "Special Keeping Requirements (SKR)" in terms of housing/exercise. No such species are to be held by a licensee until premises have been inspected and verified to be suitable for the SKR taxon.

### SNAKES

- |    |   |                         |
|----|---|-------------------------|
| 19 | <i>Demansia vestigiata</i> (De Vis, 1884) NT Qld WA   | Black Whip Snake ###    |
| 20 | <i>Demansia papuensis</i> (Macleay, 1877) NT Qld WA   | Papuan Whip Snake ###   |
| 21 | <i>Echiopsis atriceps</i> (Storr, 1980) WA            | Lake Cronin Snake       |
| 22 | <i>Echiopsis curta</i> (Schlegel, 1837) NSW SA Vic WA | Bardick                 |
| 23 | <i>Elapognathus minor</i> (Günther, 1863) WA          | Short-nosed Sedge Snake |

24 <i>Furina ornata</i> (Gray, 1842) NT Qld SA WA	Moon Snake
25 <i>Aspidites ramsayi</i> (Macleay, 1882) NSW NT Qld SA Vic WA	Woma
26 <i>Antaresia (Liasis) maculosa</i> (Peters, 1873) NSW Qld	Spotted Python
27 <i>Chondropython viridis</i> (Schlegel, 1872) Qld	Green Python
28 <i>Liasis olivaceus olivaceus</i> Gray, 1842 NT Qld WA	Northern Olive Python
29 <i>Morelia amethystina</i> (Schneider, 1801) Qld	Amethystine Python
30 <i>Morelia bredli</i> (Gow, 1981) NT	Centralian Carpet Python
31 <i>Morelia oenpelliensis</i> (Gow, 1977) NT	Oenpelli Python
32 <i>Morelia spilota spilota</i> (Lacépède, 1804) NSW Vic	Diamond Python
33 <i>Morelia spilota cheynei</i> (Wells & Wellington, 1984) Qld	Jungle Carpet Python
34 <i>Morelia spilota mcdowelli</i> (W & W, 1984) NSW Qld	Coastal Carpet Python
35 <i>Morelia spilota metcalfei</i> (W & W, 1984) NSW NT Qld SA	Inland Carpet Python
36 <i>Dendrelaphis calligastra</i> (Günther, 1867) Qld	Northern Green Tree Snake
37 <i>Enhydryis polylepis</i> (Fischer, 1886) NT Qld	Macleay's Freshwater Snake
38 <i>Stegonotus cucullatus</i> (Duméril, B & D, 1854) NT Qld	Slatey-grey Snake
39 <i>Acanthophis antarcticus</i> (S & N, 1802) NSW NT Qld SA Vic WA	Southern Death Adder
40 <i>Acanthophis praelongus</i> Ramsay, 1877 NT Qld WA	Northern Death Adder
41 <i>Acanthophis wellsei</i> Hoser, 1998 WA	Pilbara Death Adder
42 <i>Acanthophis pyrrhus</i> Boulenger, 1898 NT Qld SA WA	Desert Death Adder
43 <i>Austrelaps ramsayi</i> (Krefft, 1864) NSW Vic	Highlands Copperhead
44 <i>Austrelaps superbis</i> (Günther, 1858) NSW SA Tas Vic	Lowlands Copperhead
45 <i>Hoplocephalus bitorquatus</i> (Jan, 1859) NSW Qld	Pale-headed Snake
46 <i>Hoplocephalus stephensii</i> Krefft, 1869 NSW Qld	Stephen's Banded Snake
47 <i>Notechis ater</i> (Krefft, 1866) Tas (Excluding SA <i>ater</i> )	Black Tiger Snake
48 <i>Notechis scutatus</i> (Peters, 1861) NSW Qld SA Vic WA	Tiger Snake
49 <i>Pseudechis australis</i> (Gray, 1842) NSW NT Qld SA WA	Common Mulga Snake
50 <i>Pseudechis butleri</i> Smith, 1982 WA	Spotted Mulga Snake
51 <i>Pseudechis colletti</i> Boulenger, 1902 Qld	Collett's Snake
52 <i>Pseudechis guttatus</i> de Vis, 1905 NSW Qld	Blue-bellied Blacksnake
53 <i>Pseudechis porphyriacus</i> (Shaw, 1794) NSW Qld SA Vic	Red-bellied Blacksnake
54 <i>Pseudonaja affinis</i> Günther, 1872 SA WA	Dugite
55 <i>Pseudonaja guttata</i> (Parker, 1926) NT Qld SA	Speckled Brownsnake
56 <i>Pseudonaja inframacula</i> (Waite, 1925) SA	Peninsula Brownsnake
57 <i>Pseudonaja ingrami</i> (Boulenger, 1908) NT Qld WA	Ingram's Brownsnake
58 <i>Pseudonaja nuchalis</i> Günther, 1858 NSW NT Qld SA Vic WA	Gwardar
59 <i>Pseudonaja textilis</i> (D, B & D, 1854) NSW NT Qld SA Vic WA	Eastern Brownsnake
60 <i>Suta ordensis</i> (Storr, 1984) NT(?) WA	Ord Curl Snake
61 <i>Suta suta</i> (Peters, 1863) NSW NT Qld SA Vic WA	Common Curl Snake
<b>FROGS</b>	
62 <i>Litoria infrafrenata</i> (Günther, 1867) Qld	Giant Tree Frog ###
63 <i>Myobatrachus gouldii</i> (Gray, 1841) WA	Turtle Frog

## 2.6 Category List 6: Herpetofauna Species Prohibited for Private Keeping in Western Australia

Species of Australian reptiles and amphibians on this schedule are prohibited for keeping under private pet herpetofauna keeping and breeding licences. These reptiles may be kept for specialist study purposes under appropriate circumstances and for conservation related purposes. This Schedule also includes all other herpetofauna taxa not included on Category lists 1 through 5.

### TURTLES

<i>Chelodina kuchlingi</i> Cann, 1997 WA	Kuchling's Long-necked Turtle
<i>Elseya georgesi</i> Cann, 1997 NSW	George's Short-necked Turtle
<i>Emydura subglobosa</i> (Krefft, 1876) Qld	Painted Short-necked Turtle
<i>Pseudemydura umbrina</i> Siebenrock, 1901 WA	Western Swamp Turtle
<i>Rheodytes leukops</i> Legler & Cann, 1980 Qld	Fitzroy Turtle

### LIZARDS

<i>Diplodactylus fulleri</i> Storr, 1978 WA	Lake Disappointment Ground Gecko
<i>Diplodactylus kenneallyi</i> Storr, 1988 WA	Lake Buchanan Stone Gecko
<i>Lepidodactylus listeri</i> (Boulenger, 1889)	Christmas Island Gecko
<i>Phyllodactylus guentheri</i> Boulenger, 1885	Lord Howe Island Gecko
<i>Nephrurus deleani</i> Harvey, 1983 SA	Pernatty Knob-tailed Gecko
<i>Underwoodisaurus sphyrurus</i> (Ogilby, 1892) NSW Qld	Border Thick-tailed Gecko
<i>Aprasia aurita</i> Kluge, 1974 NSW(?) Vic	Eared Worm Lizard
<i>Aprasia pseudopulchella</i> Kluge, 1974 SA	Flinders Ranges Worm Lizard
<i>Aprasia rostrata</i> Parker, 1956 WA	Exmouth Worm Lizard
<i>Delma impar</i> (Fischer, 1882) NSW SA Vic	Many-lined Delma
<i>Delma labialis</i> Shea, 1987 Qld	Single-striped Delma
<i>Delma torquata</i> Kluge, 1974 Qld	Adorned Delma
<i>Ophidiocephalus taeniatus</i> Lucas and Frost, 1897 NT SA	Bronzeback
<i>Paradelma orientalis</i> (Günther, 1876) Qld	Brigalow Scalyfoot
<i>Ctenophorus yinnietharra</i> (Storr, 1981) WA	Yinnietharra Dragon
<i>Diporiphora convergens</i> Storr, 1974 WA	Crystal Creek Two-lined Dragon
<i>Pogona minima</i> (Loveridge, 1933) WA	Abrolhos Bearded Dragon
<i>Varanus prasinus</i> (Schlegel, 1839) Qld	Emerald Monitor
<i>Anomalopus mackayi</i> Greer and Cogger, 1985 NSW, Qld	Five-clawed Worm Skink
<i>Coeranoscincus reticulatus</i> (Günther, 1873) NSW Qld	Three-toed Snake-toothed Skink
<i>Ctenotus delli</i> Storr, 1974 WA	Darling Range Heath Ctenotus
<i>Ctenotus lancelini</i> Ford, 1969 WA	Lancelin Island Skink
<i>Ctenotus zasticus</i> Storr, 1985 WA	Hamelin Pool Ctenotus
<i>Ctenotus yampiensis</i> Storr, 1975 WA	Yampi Ctenotus
<i>Egernia kintorei</i> Stirling and Zietz, 1893 NT SA WA	Great Desert Egernia
<i>Egernia pulchra longicauda</i> Ford, 1963 Jurien Bay Is., WA	Long-tailed Rock Egernia

<i>Egernia stokesii</i> (Gray, 1845) NSW NT Qld SA WA	Spiny-tailed Skink
<i>Eulamprus leuraensis</i> Wells and Wellington, 1984 NSW	Black Mountains Swamp Skink
Glaphyromorphus sp. nov. WA	Bunbury Skink ###
<i>Lerista allanae</i> (Longman, 1937) Qld	Greater Robust Fine-lined Lerista
<i>Lerista separanda</i> Storr, 1976 WA	Dampier Land Lerista
<i>Lerista stictopleura</i> Storr, 1985 WA	Spotted-flank Lerista
<i>Lerista vittata</i> Greer, McDonald & Lawrie, 1983 Qld	Side-striped Fine-lined Lerista
<i>Menetia amaura</i> Storr, 1978 WA	Edel land Dwarf Skink
<i>Nangura spinosa</i> Qld	Nangur Skink ###
<i>Notoscincus butleri</i> Storr, 1979 WA	
<i>Niveoscincus palfreymani</i> (Rawlinson, 1974) Tas(Pedra Branca Rk)	Pedra Branca Cool Skink
<i>Pseudemoia lichenigera</i> (O'Shaughnessy, 1874) LHI NI	Lord Howe & Norfolk Islands Skink
<i>Tiliqua adelaidensis</i> (Peters, 1863) SA	Adelaide Pygmy Bluetongue

### SNAKES

Hydrophiidae (all species)	Sea snakes
Laticaudidae (all species)	Sea snakes
<i>Ramphotyphlops exocoeti</i> (Boulenger, 1887) CI	Christmas Island Blindsnake
<i>Ramphotyphlops minimus</i> (Kinghorn, 1929) NT(Groote Island)	Groote Dwarf Blindsnake
<i>Ramphotyphlops longissimus</i> Aplin, 1998 Barrow Is, WA	Barrow Island Blindsnake
<i>Liasis olivaceus barroni</i> Smith, 1981 WA	Pilbara Olive Python
<i>Morelia carinata</i> (Smith, 1981) WA	Rough-scaled Python
<i>Lycodon capucinus</i> Boie, 1827 CI	Asian Wolf Snake
<i>Austrelaps labialis</i> (Jan, 1859) SA	Pygmy Copperhead
<i>Oxyuranus microlepidotus</i> (McCoy, 1879) NSW Qld SA	Inland Taipan/Fierce Snake
<i>Oxyuranus scutellatus</i> (Peters, 1867) NSW NT Qld	Northern Taipan
<i>Denisonia maculata</i> (Steindachner, 1867) Qld	Ornamental Snake
<i>Furina dunmalli</i> (Worrell, 1955) Qld	Dunmall's Snake
<i>Hoplocephalus bungaroides</i> (Schlegel, 1837) NSW	Broad-headed Snake
<i>Notechis ater ater</i> (Krefft, 1866) SA	Peninsula Tiger Snake

### FROGS

<i>Geocrinia alba</i> Wardle-Johnson & Roberts, 1989 WA	
<i>Geocrinia vitellina</i> Wardle-Johnson & Roberts, 1989 WA	
<i>Heleioporus barycragus</i> Lee, 1967 WA	Yellow-flanked Burrowing Frog
<i>Limnodynastes depressus</i> Tyler, 1976 WA	
<i>Spicospina flammocaerulea</i>	Sunset Frog
<i>Uperoleia marmorata</i>	Marbled Toadlet
<i>Uperoleia minima</i>	Small Toadlet
