

# Snakes of the WA Goldfields

There are 5 venomous land snakes in this region that can cause an extreme life-threatening medically significant bite.

A further 9 species can debilitate victim severely with local pain and swelling, while 15 other snakes here are harmless.

The harmless snakes include 6 blind snakes (only 3 shown), 4 pythons and 5 medically insignificant technically venomous snakes.

**Desert Death Adder**  
(*Acanthophis pyrrhus*)

**Common Mulga Snake aka King Brown**  
(*Pseudechis australis*)

**Spotted Mulga Snake**  
(*Pseudechis butleri*)

**Dugite aka Spotted Brown Snake**  
(*Pseudonaja affinis*)

**Gwardar aka Western Brown Snake**  
(*Pseudonaja mengdeni*)

**Norwest Shovel-nosed snake**  
(*Brachyuophis approximans*)

**Narrow-banded Shovel-nosed snake**  
(*Brachyuophis fasciolatus*)

**Half-girdled Shovel-nosed Snake**  
(*Brachyuophis semifasciatus*)

**Desert Whip Snake**  
(*Demansia cyanochasma*)

**Bardick**  
(*Echiopsis curta*)

**Orange-naped Snake**  
(*Furina ornata*)

**Western Black-naped Snake**  
(*Neelaps bimaculatus*)

**Lake Cronin Snake**  
(*Paroplocephalus atriceps*)

**Ringed Brown Snake**  
(*Pseudonaja modesta*)

**Jan's Banded Snake**  
(*Simoselaps bertholdi*)

**Rosen's Snake**  
(*Suta fasciata*)

**Gould's Hooded Snake**  
(*Suta gouldii*)

**Monk Snake**  
(*Suta monachus*)

**Black-backed Snake**  
(*Suta nigriceps*)

**Children's Python**  
(*Antaresia childreni*)

**Pygmy Python**  
(*Antaresia perthensis*)

**Woma aka Sand Python**  
(*Aspidites ramsayi*)

**Southwest Carpet Python**  
(*Morelia imbricata*)

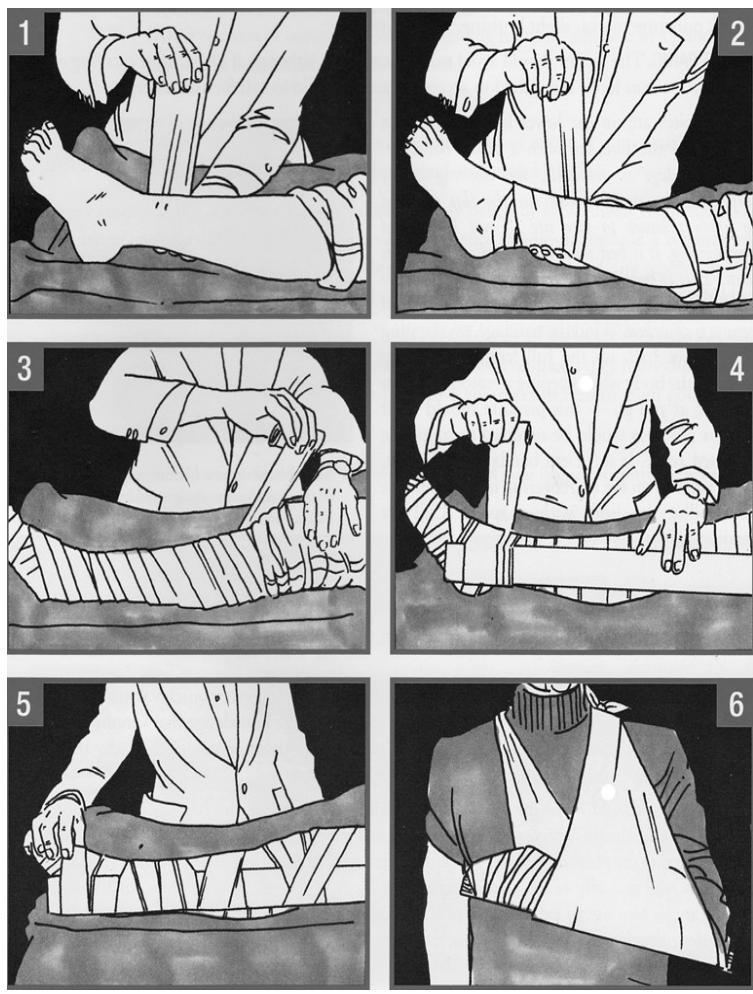

**Southern Blind Snake**  
(*Anilius australis*)

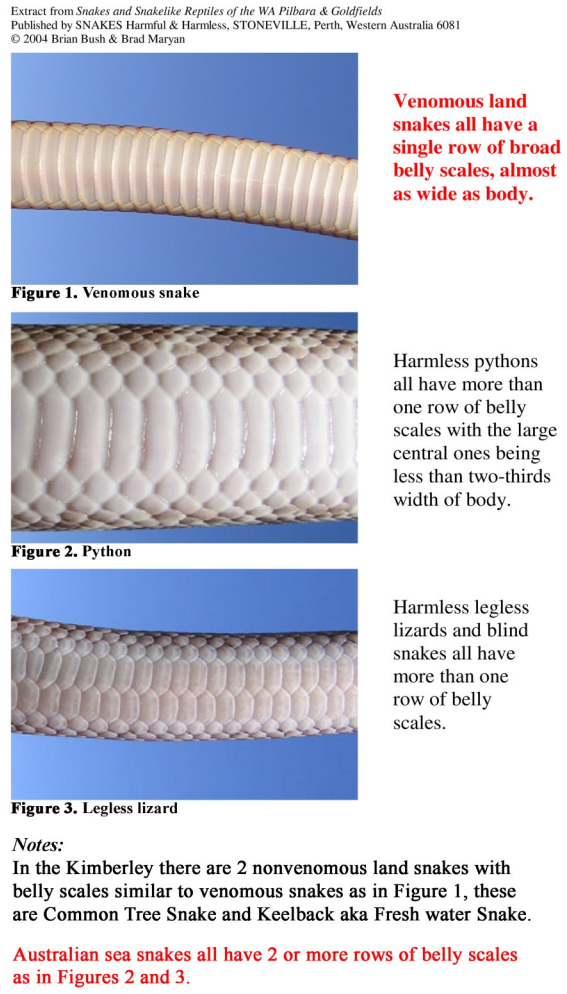

**Pale-snouted Blind Snake**  
(*Anilius hamatus*)

**Common Beaked Blind Snake**  
(*Anilius waitii*)
