

# Land Snakes of the Pilbara

There are 4 venomous land snakes in this region that can cause an extreme life-threatening medically significant bite.

A further 7 species can debilitate victim severely with local pain and swelling, while 16 other snakes here are harmless.

The harmless snakes include 8 blind snakes (only 5 shown), 5 pythons and 3 medically insignificant technically venomous snakes.

**Desert Death Adder**  
(*Acanthophis pyrrhus*)

**Pilbara Death Adder**  
(*Acanthophis wellsi*)

**Common Mulga Snake aka King Brown**  
(*Pseudechis australis*)

**Gwardar aka Western Brown Snake**  
(*Pseudonaja mengdeni*)

**Norwest Shovel-nosed snake**  
(*Brachyuropsis approximans*)

**Coppertail Whip Snake**  
(*Demansia reticulata*)

**Red Whip Snake**  
(*Demansia rufescens*)

**Orange-naped Snake**  
(*Furina ornata*)

**Ringed Brown Snake**  
(*Pseudonaja modesta*)

**Desert Banded Snake**  
(*Simoselaps anomalus*)

**Pilbara Hooded Snake**  
(*Suta gaikhorstorum*)

**Rosens Snake**  
(*Suta fasciata*)

**Little Spotted Snake**  
(*Suta punctata*)

**Pilbara Bandy Bandy Snake**  
(*Vermicella snelli*)

**Children's Python**  
(*Antaresia childreni*)

**Pygmy Python**  
(*Antaresia perthensis*)

**Black-headed Python**  
(*Aspidites melanocephalus*)

**Woma aka Sand Python**  
(*Aspidites ramsayi*)

**Pilbara Olive Python**  
(*Liasis olivaceus barroni*)

**Pilbara Blind Snake**  
(*Anilius ammodytes*)

**Pilbara Flat-headed Blind Snake**  
(*Anilius ganei*)

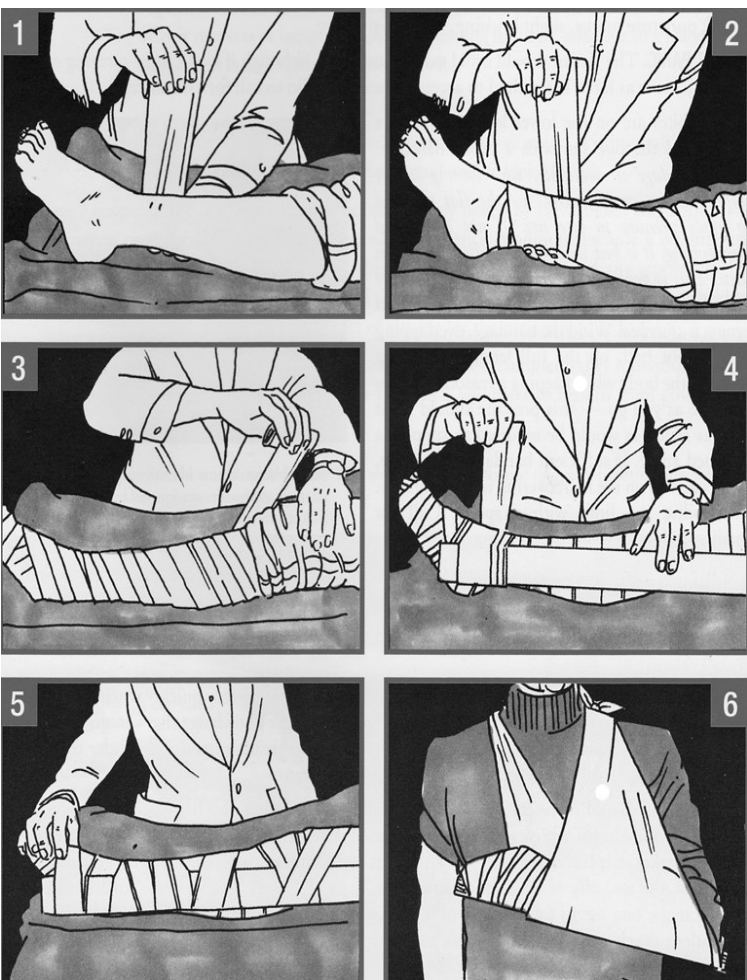

**Black-tipped Blind Snake**  
(*Anilius grypus*)

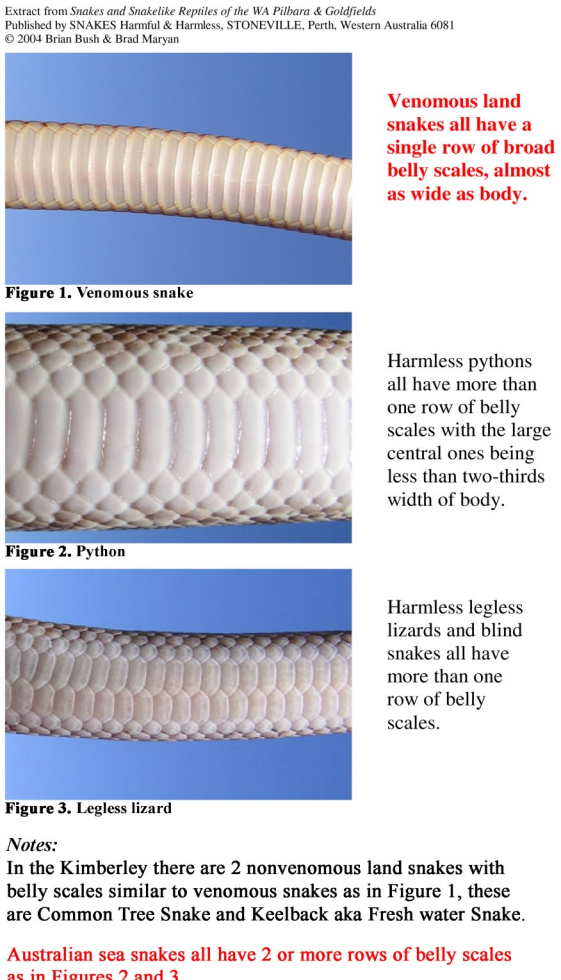

**Pale-snouted Blind Snake**  
(*Anilius hamatus*)

**Common Beaked Blind Snake**  
(*Anilius waitii*)

**Snakebite First Aid**

**Snake scales and legless lizard**
